## odor neutralizing agent *Problem Odors are Gone.*

*Don't just mask the odor,  
Eliminate it permanently with ona.*

Odorchem Manufacturing Corporation offers the most up-to-date odor control equipment. We use the latest technology to create the most efficient distribution and dispersion systems for our odor neutralizers.

These systems have been successfully installed in restaurants, nursing homes, hotels, greenhouses, in-house composting facilities, locker rooms, and garbage collecting areas with outstanding results.

Odorchem's methods of application range from misting systems to air displacement systems that evenly and effectively distribute ona throughout the desired area to neutralize odor molecules. Odorchem's odor neutralizing equipment has been specifically designed for the **ona range of products**.

### **ona mist dispenser**

This dispenser will release a burst of **ona mist** in 7.5, 15 or 25 minute intervals, uniformly for one month or longer. Under normal airflow conditions, the dispenser will service a room up to 6,000 cubic feet.

### **ona breeze**

The **ona breeze** evenly distributes the **ona gel** and provides odor neutralization for a room up to 1,500 square feet (15,000 cubic feet) for 3 – 6 weeks. (This period will vary based on the ambient temperature and humidity levels of the room, and the airflow setting of the **ona breeze**.)

### **ona odor stop**

To neutralize airborne odors in larger facilities such as schools, gymnasiums, warehouses and office buildings up to 10,000 sq. ft., the **ona odor stop** easily connects with the air ventilation system already in place. The **odor stop** has an adjustable airflow control and this fan unit evenly distributes ona gel throughout the building for 4 – 6 weeks. (This period will vary based on the ambient temperature and humidity levels of the room, and the airflow setting of the **ona odor stop**.)

### **ona storm**

The **ona storm** evenly distributes the **ona gel** and provides odor neutralization for a room up to 10,000 square feet (100,000 cubic feet) for 8 – 12 weeks. (This period will vary based on the ambient temperature and humidity levels of the room, and the airflow setting of the **ona storm**.)

### **ona carbon-air**

The **ona carbon-air** is capable of odor neutralizing a room up to 10,000 sq ft. **Ona's** 30L gel pail will last from 3 – 4 months, depending on temperature and humidity levels of the room, and the airflow setting of the **carbon-air**. The carbon filter should be replaced after 6 months of moderate use, or when effectiveness of carbon filtering has degraded.
